

## EquiShure

Research has shown that EquiShure effectively maintains optimal hindgut pH.

- Effectively maintains the pH of the hindgut, reducing the risk of subclinical acidosis
- Allows for optimal digestion of nutrients in forages and concentrates
- Creates an environment in which dietary energy can be absorbed efficiently
- Increases appetite in picky eaters
- Is easy to feed, as it is mixed into a horse's grain meal

## B Quiet

Thiamine and Magnesium Supplement

- Provides nutritional support to excitable and high-strung horses
- Contains thiamine, an essential nutrient for carbohydrate metabolism and nerve transmission
- Is easy to administer using an oral syringe

## DuraPlex

- Supports bone growth in horses involved in all disciplines
- Provides the proteins, vitamins and minerals necessary for strong bone development
