Pacemaker X

Extruded feed for
 performance horses

Fortified with Brooks exclusive
Oxiguard system of natural source
 Vitamin E and organic selenium!

Bioavailable Vitamin E and organic selenium
 work synergistically as effective antioxidants to
 minimize muscle soreness and fatigue.

*Our commitment to quality
 drug free manufacturing is
 your satisfaction guarantee!*

Guaranteed Analysis

Crude Protein (min.)	13 %
Crude Fat (min.)	8.0 %
Crude Fibre (max.)	12 %

Features and Benefits of Pacemaker X

❖ **Formulated with superior quality cereal grains, super fibres and soy oil.**

A blend of energy sources is included, with rapidly available carbohydrates emphasized to support maximum speed and power.

Extruded without separation of ingredients.

Extrusion improves the digestibility of starch, slows feed intake, and allows for higher fat inclusion.

Manufactured with a proprietary form of Saccharomyces Cerevisiae a prebiotic with a wide body of research.

The addition of a proprietary yeast culture improves digestion of fibre and promotes more efficient use of nutrients.

Balanced vitamin and chelated mineral content

Supplies micronutrient fortification not found in forages and eliminates the need for expensive supplements. Chelated minerals are more readily and thoroughly absorbed for improved health and performance.

Contains a full complement of B Vitamins and amino acids

Meets all of the daily maintenance requirements for B Vitamins including biotin and provides full spectrum of essential amino acids

Formulation is fixed

A fixed formula means that we do not substitute inferior low cost ingredients for superior ingredients to lower the cost of production.

Pacemaker X is formulated with carefully selected ingredients to ensure maximum palatability and consistency.

Guaranteed Quality

Pacemaker X Description

Pacemaker X is a research leading extruded performance feed for horses active in high intensity disciplines requiring large amounts of energy. Pacemaker X draws energy primarily from carbohydrates and fat from soy oil. Pacemaker X has an optimum starch and sugar content for high intensity exercise requiring readily available energy from soluble carbohydrates combined with stamina producing fat energy. Extrusion enhances the digestibility of carbohydrates while slowing intake.

Pacemaker X has earned a reputation among many top trainers and owners for supplying total nutrition in a palatable form that horses take to readily and stay on during competition or training.

Feeding Suggestions

Feed horses according to level and type of activity and to maintain ideal body condition.

Mature Weight	900 lbs. (400 kg.)	1100 lbs. (500 kg.)	1300 lbs. (600 kg.)
Light work *	4-9 lbs. (2.0-4.0 kg.)	6-11 lbs. (2.75-5.0 kg.)	9-12 lbs. (4.0-6.0 kg.)
Moderate work **	6-11 lbs. (2.75-5.0 kg.)	9-13 lbs. (4.0-6.0 kg.)	11-15 lbs. (5.0-6.75 kg.)
Heavy work ***	9-13 lbs. (4.0-6.0 kg.)	11-15 lbs. (5.0-6.75 kg.)	13-17 lbs. (6.0-7.75 kg.)

* ie. jogging, trail riding, pleasure etc.

** ie. dressage, jumping, cutting, roping etc.

*** ie. racing, polo, eventing etc.

Note: Warmblood and Draft type horses may require different amounts from light horse breeds. Contact a Brooks Feed representative or submit a request on our interactive web site.

Amount of feed required is dependent on the body condition, the metabolism and the type of activity that the horse is used for. For each pound of **Pacemaker X** fed daily below ½ pound per 100 pounds of the horse's bodyweight add ¼ pound (115 grams) **Brooks Enhancer or All Phase 20**. For specific feeding recommendations consult a Brooks Feed representative or submit a request on-line using our interactive feeding guide. Provide fresh clean water and free choice salt at all times with a minimum of 1% of the horse's bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount fed varies according to the quality of hay or pasture. Hay analysis is recommended to ensure a balanced ration.

A list of ingredients is available by contacting the manufacturer.
