Vitamin E (min.)	170 IU/KG.
Selenium (min. added)	.35 ppm.
NSC (low)	

### Features of Brook's Complete Fit & Fibre

**Moderate energy high fibre formula with added fat.**

Can be used as a concentrate for maintenance, light or moderate exercise or to add extra fibre to a ration for performance horses.

**Low glycemic formula with highly digestible fibre sources, high quality vegetable fat and low starch and sugar.**

Suitable for horses on a reduced starch diet or as part of a diet where hay must be limited such as those having allergies or Chronic Obstructive Pulmonary Disease.

**Balanced with vitamins and chelated minerals.**

Supplies micronutrient fortification including highly digestible chelated (organic) minerals not found in forages and reduces the need for expensive supplements.

**Made With Yea Sacc.**

Addition of proprietary yeast product improves digestion of fibre and promotes more efficient use of feedstuffs.

**Carefully selected ingredients to maximize palatability.**

Readily accepted by all types of horses.

# Fit & Fibre Description

Fit & Fibre is a fibre and fat based feed suitable for a wide range of horses. The low glycemic, low NSC formula with added fat makes Fit & Fibre an excellent choice for horses needing a moderate amount of controllable energy. Fit & Fibre draws energy primarily from high quality fibre sources without “filler fibres” common in lower quality feeds and added fat to increase the energy level. Low starch and sugar levels also make Fit & Fibre a good choice for horses diagnosed with *Cushings, Polysaccharide Storage Myopathy, excitability, chronic laminitis, or tying up*. Fit & Fibre can be used as a partial substitute for hay where the amount of hay is limited due to allergies or Chronic Obstructive Pulmonary Disease.

Fit & Fibre supplies total nutrition in a palatable form that horses take to readily and stay on during training, competing or pleasure riding while outperforming comparably priced competitive products.

## Feeding Suggestions

Feed horses according to level and type of activity and to maintain ideal body condition

Mature Weight	900 lbs. (400 kg.)	1100 lbs. (500 kg.)	1300 lbs. (600 kg.)
Idle horses	3-5 lbs. (1.5-2.25 kg.)	4-6 lbs. (2.0-2.75 kg.)	5-8 lbs. (2.25-3.5 Kg.)
Light work *	4-9 lbs. (2.0-4.0 kg.)	6-11 lbs. (2.75-5.0 kg.)	9-13 lbs. (4.0-6.0 kg.)
Moderate work **	6-11 lbs. (2.75-5.0 kg.)	9-13 lbs. (4.0-6.0 kg.)	11-15 lbs. (5.0-6.75 kg.)

\* ie. jogging, trail riding, pleasure etc.

\*\* ie. dressage, jumping, cutting, roping etc.

*Note: Warmblood and Draft type horses may require different amounts from light horse breeds.  
Contact a Brooks Feed representative or submit a request on our interactive web site.*

Amount of feed required is dependant on the body condition, the metabolism and the type of activity the horse is used for. For each pound of *Fit & Fibre* fed daily below ½ pound per 100 pounds of the horse’s bodyweight add ¼ pound (115 grams) *Brooks Enhancer or All Phase 20*. For specific feeding suggestions consult a Brooks Feed representative or submit a request on-line using our interactive feeding guide. Provide fresh clean water and free choice salt at all times with a minimum of 1% of the horse’s bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount fed varies according to the quality of hay or pasture. Hay analysis is recommended to ensure a balanced ration.

A list of ingredients is available by contacting the manufacturer.
