satisfaction guarantee!*

## Guaranteed Analysis

Crude Protein (min.)	12 %
Crude Fat (min.)	4 %
Crude Fibre (max.)	18 %
Calcium (act.)	.8 %
Phosphorus (act.)	.6 %
Copper (act.)	45 ppm.
Zinc (act.)	135 ppm.
Sodium (act.)	.4 %
Vitamin A (min.)	11000 IU/KG.
Vitamin D (min.)	1100 IU/KG.
Vitamin E (min.)	200 IU/KG.
Selenium (min.added)	.4 ppm.
NSC (low)	

## Features and Benefits of Phase IV

**Formulated with highly digestible fibre and moderate starch and sugar (non structural carbohydrate) ingredients.**

**Supplies sufficient calories for maintenance or light exercise without the undesirable effects of a high carbohydrate ration.**

**Balanced with vitamins and chelated minerals.**

**Supplies micronutrient fortification including highly digestible chelated (organic) minerals not found in forages and reduces the need for expensive supplements.**

**Made With Yea Sacc.**

**Addition of proprietary yeast product improves digestion of fibre and promotes more efficient use of feedstuffs.**

**Versatile feed with several uses.**

**Useful as a light concentrate for maintenance, for broodmares, light exercise, or for training young horses while maintaining an ideal body condition and a calm attitude.**

**Carefully selected ingredients to maximize palatability.**

**Readily accepted by all types of horses.**

## Phase IV Description

Phase IV is a moderate energy, fibre based feed suitable for maintenance, light exercise, open or early gestation broodmares or training young horses. The low glycemic, low NSC formula makes Phase IV an excellent choice for horses needing a moderate amount of controllable energy. Phase IV draws energy primarily from high quality fibre sources without “filler fibres” common in lower quality feeds. Low starch and sugar levels reduce excitability making Phase IV a good choice for pleasure horses, open or early gestation broodmares as well as young horses while in training.

Phase IV supplies total nutrition in a palatable textured or pelleted form that horses take to readily and stay on while working on lay up or in training.

### Feeding Suggestions

Feed horses according to level and type of activity and to maintain ideal body condition.

Mature Weight	900 lbs. (400 kg.)	1100 lbs. (500 kg.)	1300 lbs. (600 kg.)
Idle horses	3-5 lbs. (1.5-2.5 Kg.)	4-6 lbs. (2.0-2.75 kg.)	5-8 lbs. (2.5-3.5 kg.)
Light work *	4-6 lbs. (2.0-2.75 kg.)	5-6 lbs. (2.5-2.75 kg.)	6-9 lbs. (3.0-4.0 kg.)
Moderate work **	6-9 lbs. (3.0-4.0 kg.)	9-11 lbs. (4.0-5.0 kg.)	11-13 lbs. (5.0-6.0 kg.)
Broodmares idle or early gestation	3-5 lbs. (1.5-2.5 Kg.)	4-6 lbs. (2.0-3.0 kg.)	5-9 lbs. (2.5-4.0 kg.)

\* ie. jogging, trail riding, pleasure etc.

\*\* ie. dressage, jumping, cutting, roping etc.

*Note: Warmblood and Draft type horses may require different amounts from light horse breeds.  
Contact a Brooks Feed representative or submit a request on our interactive web site.*

Amount of feed required is dependant on the body condition, the metabolism and the type of activity the horse is used for. For each pound of **Phase IV** fed daily below ½ pound per 100 pounds of the horse's bodyweight add ¼ pound (115 grams) **Brooks Enhancer or All Phase 20**. For specific recommendations consult a Brooks Feed representative or submit a request on-line using our interactive feeding guide. Provide fresh clean water and free choice salt at all times with a minimum of 1% of the horse's bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount fed varies according to the quality of hay or pasture. Hay analysis is recommended to ensure a balanced ration.

A list of ingredients is available by contacting the manufacturer.
